Insights

Best Trading Pair: **EURGBP** with a net profit of £2,438.92.

Worst Trading Pair: **GBPUSD** with a net loss of £1,046.15.

Best Trading Session: **New York Session** with a total profit of £7,401.40.

Worst Trading Session: Out of Session with a total loss of £4,977.57.

Advice

☑ Fo

Focus on trading the EURGBP pair for highest returns.

Preview and refine strategies for pairs and sessions with lower performance.

Aim for at least 2 RR Ratio and 50% win rate to enhance profitability.

Oconsider only trading LDN and NY sessions - trading out of session proves to be a hindrance to being profitable.

 \bigcirc If you stayed away from trading 'Out of Session', you would've prevented the loss of £-4,977.57.

Summary

Total Profit and Loss (P&L): The account has a cumulative profit of £3,255.22.

Cumulative Balance: The balance has shown steady growth over the period with occasional drawdowns.

Net Profit per Symbol: The performance varies across different symbols, highlighting areas of strength and weakness.

Trading Session Performance: The NY session has been the most profitable, followed by the LDN session.

This detailed report helps in understanding the trading performance, identifying profitable strategies, and areas that need improvement.
